DETAILED ACTION

Allowable Subject Matter

Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1 and 6.

Specifically regarding claims 1 and 6, Raguin et al. (6587618) teach the state of the art of aligning a fiber array with a collimator array.

But, Raguin et al. fail to explicitly teach calculating a mean value L_a of the optical length L of the laser beam which passes from said emitting side lens through said receiving side lens; obtaining two values of the distance d_0 between said emitting side fiber array and said emitting side lens in which the distance from said emitting side lens through the beam waist of the laser beam collimated by said emitting side lens is equal to $L_a/2$; and selecting the smaller value of said two obtained values; or wherein the distance d_0 between said emitting side fiber array and said emitting side lens is the smaller value of two values obtained based on a mean value L_a of the optical length L of the laser beam which passes from said emitting side lens through said receiving side lens, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
